

**PROBOND**décor<sup>®</sup>  
Brushed Finish  
TYPICAL SPECIFICATION

Composite panels shall be PROBOND Décor<sup>®</sup> Brushed Finish as manufactured and supplied throughout Australia exclusively by PROBOND<sup>®</sup> Architectural.

PROBOND Décor<sup>®</sup> panels shall consist of 2 face sheets of 0.30mm thick aluminium sandwiching a core of pure LDPE (low density polyethylene), formed in a continuous process.

PROBOND Décor<sup>®</sup> panels shall consist of an overall thickness of 3mm.

Face sheet shall be brushed finish as selected from the PROBOND Décor<sup>®</sup> range. Spray application not acceptable. Applied coating shall be protected with peelable UV stabilised PE protective film.

All PROBOND Décor<sup>®</sup> panels prior to fabrication shall be stored horizontally on a dry, flat, level surface and protected from damage from other trades.

Fabrication techniques as recommended by PROBOND<sup>®</sup> Architectural shall be strictly adhered to. These include cutting, grooving, folding, bending and rolling. Information concerning these techniques can be obtained from PROBOND<sup>®</sup> Architectural.
