

PROBOND classic[®] X21

PROBOND ClassicX21[®] is a great intermediate panel for all types of general signage applications.

Available in a wide range of sizes with a 0.21mm skin thickness, the PROBOND ClassicX21[®] range of panels is the ideal choice for every day panel requirements for sign-makers.

It is suitable for CNC routing and folding and comes with clear protection film for quick and easy colour identification.
