

# PROBOND digital®

PROBOND Digital® is a 3mm panel designed for ultimate results with all direct print UV digital inkjet machines. This optimum coated panel is designed to ensure maximum ink adhesion without images scratching or marking easily and increases intensity and brightness of colours.

PROBOND Digital® comes with a clear "easy-peel" protective liner which ensures no ghosting or adhesive marks show through after printing.

It has 0.21mm aluminium skins with premium grade aluminium making it also suitable for folding.
