

PROBONDultra**FR®**

PROBOND UltraFR® is one of the only Fire Retardant Signage Grade panels in the world and is designed for where a fire retardant panel with a Group1 BCA Classification is required for your signage application.

The mineral core is designed to resist burning under extreme fire conditions and has a PPG FEVE Coating for extended outdoor durability designed to withstand the harsh Australian UV conditions. It is the highest standard of panel for all signage applications.

* This product is not suitable for use where non-combustible panel is required
