

TECHNICAL DATA

PROCORE A1®

PROCORE A1® is Deemed-to-Satisfy (DtS) Non-Combustible when tested to AS 1530.1 and AS 1530.3 as per the requirements of the BCA/NCC

PROCORE A1® is one of Australia's leading deemed to satisfy non-combustible aluminium panels.

Developed and manufactured by Probond Aluminium Cladding Panels, PROCORE A1® is the same as traditional aluminium composite panel, however the advanced technology of the core is constructed from a complete aluminium structure rather than from a combustible material, meaning that it contains ZERO polyethylene.

The benefits of PROCORE A1® include its high mechanical properties and simple fabrication. The outstanding surface flatness is enhanced with a high quality PVDF coating system, which provides optimum resistance to weather and industrial pollutants and comes in a vast range of colours, as well as a selection of special finishes such as zinc and woodgrain effects.

Not only does it look exactly like traditional Aluminium Composite Panel, it is also the same to fabricate and install making it a popular choice by installers.

PROCORE A1® requires minimal maintenance and comes with excellent long-term performance making this the first choice for all aluminium cladding projects.

ADVANTAGES OF PROCORE A1

- Deemed non-combustible as required by the BCA
- Tested to AS1530.1 & AS1530.3
- Non-Combustible Aluminium Core Technology
- ZERO Polyethylene
- Visually the same as traditional composite panel
- Cost effective, large stock holdings and short lead times

1. TYPICAL COMPOSITION

Aluminium Skin

5005 Series Marine Grade aluminium offering superior performance, improved rigidity and excellent processing when CNC cutting and folding.
Face: 0.70mm thick, back: 0.50mm

Adhesive

Henkel™ Hot Melt Adhesive for superior adhesion.

Core

Unique technology non-combustible core of profiled aluminium construction

Paint Finish

The most durable coating available - PPG Kynar 500 PVDF Coating for long-term outdoor durability. Standard PVDF range is Satin Finish.

Protective Film

Designed to protect the panel during transit and installation, the film is clearly marked with the panel type for easy identification.

Quality ISO 9001

3. FIRE RESISTANCE

While the visual aspect of modern architecture is vital, form and function are also significant factors, as such, sustainability, thermal insulation and fire protection are critical considerations.

PROCORE A1® is one of the few Aluminium Composite Panels produced globally to be deemed non-combustible under the Building Code of Australia (BCA) and when tested to AS1530.1.

While PROCORE A1® has the same visual appearance as traditional composite panel, it is the innovative core technology where the difference occurs. The core is constructed from a aluminium in a wave-form structure rather than combustible material such as polyethylene or fire rated mineral.

This makes PROCORE A1® the ideal product for applications where fire resistance is required and where fire safety is essential, including schools, hospitals and high-rise environments.

As with any building product, the use of PROCORE A1® must be authorised by the appropriate regulatory body.

The Fire Resistance standards achieved by PROCORE A1® are:

PROCORE A1			
TEST STANDARD	RESULT		
AS1530.1	DEEMED NON-COMBUSTIBLE		
AS1530.3	Pass	Ignitability Index	0
	Pass	Heat Evolved	0
