

PROMINIUM[®]

TYPICAL SPECIFICATION

Composite panels shall be PROMINIUM[®] as manufactured and supplied throughout Australia exclusively by PROBOND[®] Architectural.

PROMINIUM[®] panels shall consist of a solid aluminium panel which is 3mm thick 3003 aluminium alloy and formed in a continuous production process, meeting the following test criteria:

AS/NZS 1530.1-1999

PROMINIUM[®] panels shall consist of an overall thickness of 3mm.

The face sheet of each PROMINIUM[®] panel shall be pre-finished with a PPG Kynar 500 PVDF coating for extended outdoor durability with optimum UV qualities. Spray application not acceptable. Applied coating shall be protected with peelable UV stabilised PE protective film.

All PROMINIUM[®] panels prior to fabrication shall be stored horizontally on a dry, flat, level surface and protected from damage from other trades.

Fabrication techniques as recommended by PROBOND[®] Architectural shall be strictly adhered to. These include cutting, grooving, folding, bending and rolling. Information concerning these techniques can be obtained from PROBOND[®] Architectural.
